Updates and fixes
Performance tuning
Long-term support

CUSTOM

SOFTWARE DEVELOPMENT

We design and develop custom systems that match real business operations instead of forcing teams to adapt to generic tools.

**SYS****BUSINESS SYSTEMS**

CRM, ERP modules, HR, finance, project tracking.

OPS**OPERATIONAL PLATFORMS**

Workflows, approvals, reporting, internal portals.

**DAT
A****DATA DASHBOARDS**

KPIs, analytics, management views, live reports.

API**API INTEGRATION**

Payment, SMS, ERP, logistics, maps, third-party systems.

MOBILE

APPLICATION

Native and cross-platform mobile applications designed for customers, staff, field teams, logistics, service requests, and digital commerce.

APP**CUSTOMER APPS**

Registration, profiles, service requests, notifications.

GPS**FIELD APPS**

Location, tasks, checklists, photos, reporting.

KPI**MANAGEMENT APPS**

Dashboards, approvals, performance tracking.

UX**UX/UI DESIGN**

Modern interfaces built for clarity and ease of use.

WEB

PLATFORMS & E-COMMERCE

Responsive web platforms, strong performance, clear content structure, and flexible admin tools.

**WEB****CORPORATE WEBSITES**

Professional presentation, multilingual content, SEO-ready structure.

SHOP**E-COMMERCE**

Catalogs, carts, checkout, payments, order management.

PORT**CLIENT PORTALS**

Accounts, requests, documents, approvals, notifications.

ADMIN**ADMIN PANELS**

Easy content control, roles, analytics, permissions.

AI

AUTOMATION & DATA

AI and automation solutions that reduce repetitive work, organize information, and help management make faster decisions.

**AI****AI ASSISTANTS**

Internal knowledge assistants, customer response support, guided workflows.

AUTO**WORKFLOW AUTOMATION**

Automated approvals, reminders, data routing, task creation.

**DAT
A****DATA PROCESSING**

Structured reports, data cleaning, document handling.

BI**BUSINESS INTELLIGENCE**

Dashboards, KPIs, trend analysis, operational visibility.

CLOUD

SECURITY & SUPPORT

**CLOUD DEPLOYMENT**

Server setup, hosting, backups, scaling and monitoring.

**SECURITY BASICS**

Access control, SSL, backups, safe architecture.

**PERFORMANCE**

Speed optimization, code review, monitoring, maintenance.

**SUPPORT MODEL**

Bug fixes, updates, enhancements, continuous improvement.

OUR

DEVELOPMENT METHOD

A clear delivery framework from understanding requirements to deployment and long-term improvement.

01**DISCOVER**

Understand goals, users, workflows, and priorities.

02**DESIGN**

Define structure, interface, features, and system logic.

03**BUILD**

Develop frontend, backend, database, integrations, and admin tools.

04**TEST**

Review usability, performance, security, and real business scenarios.

05**LAUNCH**

Deploy, train users, and support first operation period.

06**IMPROVE**

Maintain, optimize, and add features as the business grows.

READY TO BUILD

YOUR DIGITAL PRODUCT

ZEDX Digital Solutions supports clients from idea validation and system planning to software development, launch, and long-term technical support.
